Road-map for Success at Eleven Plus

By Pradeep Kumar

MAGICAL METHODS

HELLO, PARENTS!

Are you a parents of a student in Year-2 or Year-3 and targeting Eleven Plus then this information is for you.

I hope that you are already aware of what is 11 plus and what is asked in this examination. Therefore, I will move directly to the point and I will take you through the process of creating a ROAD-MAP for success.

But before that I will answer some Frequently Asked Questions.

WHEN

When to make up your mind and start mentally preparing your kids?

The ideal age to start mentally preparing your kids for 11 plus is when the child enters in Year 2 or 7 years of age.

MAGICAL METHODS

DESIRED SKILLS

What are the Skills which are required to be successful at Eleven Plus?

The student should be good with Mental Calculation, Multiplication Tables and Long Division, vocabulary, concentration, Memory, Logical Reasoning, critical thinking & problem solving.

We can assess Skills of your child and provide you a detailed report in 24 hrs.

Road-Map

Working on Vocab, Reading Comprehension and
creative writing Development

MAGICAL METHODS

STAGE-1+2

Simple Vocabulary & Reading habit Development

This process should start very early. Normally, when the student is in Year-2, the objective of this stage is the student should have simple words in his/her vocab.

MAGICAL METHODS

STAGE-3

Vocabulary & Reading habit Development-2

This process should start when the student is in Year-3. The objective of this stage is that the student should have a little difficult words in his/her vocab.

MAGICAL METHODS

STAGE-4

Vocabulary & Reading comprehension Development

This process should start after Christmas, when the student is in Year-3. If you have followed all the above stages, then this stage should come automatically. The objective of this stage is that the student will be able to comprehend a given paragraph.

MAGICAL METHODS

STAGE-5

Creative Writing Development

This process should start when the student is in Year-5. If you have followed all the above stages, then this stage should come automatically. Creative writing requires good vocab. The objective of this stage is that the student will be able to think and write on a subject in his/ her own words.

MAGICAL METHODS

STAGE-6

Test Taking

This process should start when the student is about to get in Year-6. The student should take more and more test.

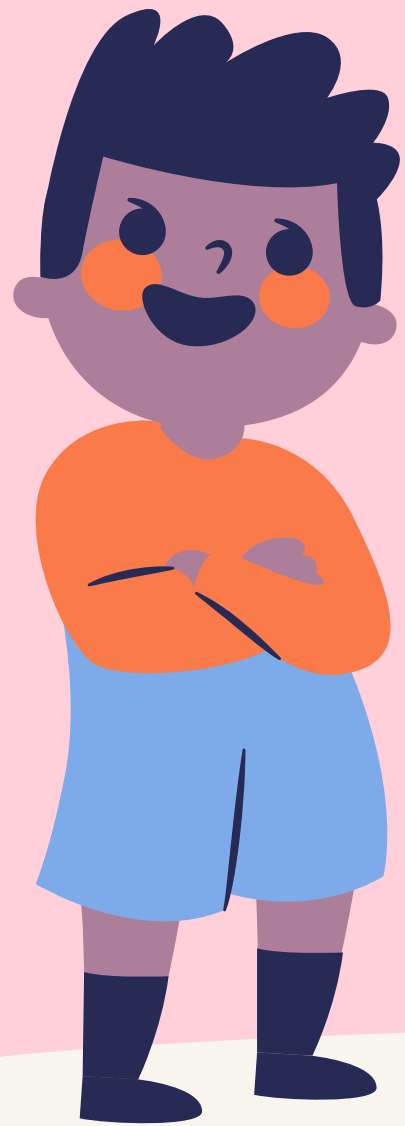

MAGICAL METHODS

Road-Map

Working on basic Mathematical & Non Verbal Reasoning Skills- Detailed Explanation

MAGICAL METHODS

STAGE-1

The student should be master of simple Calculation

This process should start very early. Normally, when the student is in Year-2. The objective of this stage is the student should be able to do one digit plus one digit and two digit plus one digit in less than 7 seconds.

The work on his imagination, logic, concentration, memory, reasoning ability and problem solving should start. The objective is that the student should be able to understand simple logic.

MAGICAL METHODS

STAGE-2

The student should be good with tables up to 9

Again this process should start when the student is in Year-2. The objective of this stage is that the student is able to do tables up to nine in less than 3 seconds.

The work on his imagination, logic, concentration, memory, reasoning ability and problem solving should continue. The objective is that the student should be able to use simple logic.

MAGICAL METHODS

STAGE-3

The student should be good with Addition and subtraction of 2 digits

Addition and subtraction of 2 digits plays very big role in 11 plus kind of competitive exam. This process should start when the student is in Year-3. The student should be able to do 2 digit plus 2 digit number and two digit minus two digit number in 5 seconds or less.

The work on his imagination, logic, concentration, memory, reasoning ability and problem solving should continue. The objective is that the student should be able to understand and use complex logic.

MAGICAL METHODS

STAGE-4

The student should be good with Mental Multiplication of bigger numbers

This process should start when the student is about to go to Year-4 or is in Year-4. The objective of this stage is that the students should be able to do tables up to 99 in less than 5 seconds.

The work on his imagination, logic, concentration, memory, reasoning ability and problem solving should continue. The objective is that the student should be able to work on deductive logic.

MAGICAL METHODS

STAGE-5

The student should be good with division & Fraction

This process should start when the student is about to go to Year-5 or is in Year-5. The objective of this stage is that the students should be able to do division and fractions mentally.

The work on his imagination, logic, concentration, memory, reasoning ability and problem solving should continue. The objective is that the student should be able to work on inductive logic.

MAGICAL METHODS

STAGE-6

Solve, Solve, Solve

This process should start when the student is about to go to Year-6 or is in Year-6. The objective of this level is to solve as many problems as the student can.

MAGICAL METHODS

Road-Map Snapshot

Preparation Stages	When to Start?	Mathematical Skills	Logical Reasoning	Vocab & RC
Stage-1	Year-2	Should be master of simple calculation	Simple Logic	Simple Vocab & Reading habit
Stage-2	Year-2	Should be good with tables up to 9	Simple Logic	Simple Vocab & Reading habit
Stage-3	Year-3	Should be good with Addition & Subtraction of 2 digits	Complex Logic	Vocab & Reading habit
Stage-4	Year-4	Should be good with Mental Multiplication of Bigger numbers	Deductive Logic	Vocab & Reading Comprehension
Stage-5	Year-5	Should be good with division & fraction	Inductive Logic	Creative Writing
Stage-6	Year-6	Solve more & more problems	Solve more & more problems	Take test
