One of the parents approached us in the month of September 2023 about developing her young child aged 6 years. She wanted to develop the mental calculations of her second child from the very beginning because her older one was performing very poorly. We directed her to our DIY course: Teach Your Little Ones. She subscribed to the course immediately and started going through it. While going through it, she realized that this method could develop her older one as well. But time was not on her side. The older one had appeared in the Grammar School exam in Sept and was scheduled to appear in quite a few private schools. Her mother wrote on 25th Sept 2023.

She has been giving the exams since beginning of Sept. However, Tiffin Girls is on the 6th Oct and after that she is trying for quite a few private schools as well through November. Any help to nurture her focus at this time could mean a lot for her. She may be feeling saturated too.

We scheduled her MQ test quickly. Her MQ score was 0.42. On the MQ scale, it was below average.

MAGICAL METHOD!

MQ: Mind Quotient

Mind Quotient	Inference
0 – 0.3	Very Poor
0.31 – 0.50	Below Average
0.51 – 0.60	Average
0.61 – 0.70	Above Average
0.71 – 0.80	Good
0.81 – 0.90	Very Good
0.91 – 0.95	Excellent
0.95 – 1.00	Extremely Good
Above 1.00	Top Class

What is an MQ Score?

MQ (Mind Quotient) is a standard developed by Magical Methods which gives you an idea of the ability of your child. Via the MQ Test, we measure different skills of a child which contribute to success. Through the MQ test we are able to understand clearly the problem areas of the child. It requires about 30 minutes of One-to-One online live interaction with the Magical Methods Teacher.

The child was doing finger counting and taking a long time doing addition and subtraction. She was slow as per 11 plus standard. She needed improvement in her concentration and memory. Her logical reasoning ability, critical thinking and problem-solving ability needed considerable improvement.

We immediately scheduled her 12 classes and started working with her.

Her mother wrote on 30th Sept 2023 after the third class.

My daughter turned so positive once the class was over, thank you so much.

The journey was difficult. We continued working with her on her concentration, hand-eye coordination and mental addition and subtraction of one-digit numbers. She got over her struggles after 6th class and started catching up with the speed.

Her mother wrote on 5th October 2023.

Good morning Mr Pradeep,
Thank you for the lessons so far, my daughter seems happy and says she has improved.

We finished 12 classes quickly, and now it was time for the MQ test.

We found out that her MQ score improved from 0.42 to 0.57. An improvement of about 450%. But we were far away from our target MQ score. According to our research, to pass 11+ the MQ score of a student should be above 0.81. We wrote to her mother.

Now she is a little better equipped. But the GAP is still there. If you can plan 12 classes more than that will help her. Thank you.

Her Mother replied quickly

Thank you so much. My daughter mentioned that she would like to continue classes with you and she feels positive.

Her mother enrolled her for another 12 classes on 23rd Oct 2023.

We scheduled her 12 classes and started working. Her speed & accuracy started improving quickly. After 12 classes, we were confident that we had overachieved the target MQ score. Her MQ score improved from 0.57 to 0.86. A jump of 0.29. An improvement of about 870%. We were satisfied with the work. We shared the report with her mother, saying that our target MQ score had been achieved.

A few days later her mother wrote

Good morning Mr Pradeep,
So any suggestions here after? Can you develop her skills further?

Yes. We said. Her daughter went for another 12 sessions with us and her MQ score improved to 1.03. A MQ Score above 1 is a dream come true. She entered in Magical Methods Hall of fame. Kids who score more than 1 on the MQ scale enter this exclusive space. Her daughter started performing very well everywhere. She was successful with Tiffin stage-1 and several other private schools. We had a happy customer.
